## Experience

### January 2026 – Present

Die Manufaktur (StAF), Graz

#### Digital Competence Learning Facilitator – Sales Consulting

Primary focus on digital knowledge transfer and internal training. Independent research, structured analysis, and didactic preparation of digital topics for the creation of training materials and workshops. Support in digital project development and in designing practical, solution-oriented approaches. Additional support in sales and customer advisory services.

### October 2025 – January 2026

Job Seeking

### Education Software Development

### February 2023 – October 2025

edvgraz

#### Apprenticeship in Application Development - Coding

Comprehensive training in application and web development with a focus on object-oriented programming, structured software development, and database design.

Key areas: Frontend development with HTML, CSS, and TypeScript, database design with SQL, and implementation of practical projects according to established development principles. Successfully completed with final apprenticeship examination.

### Internships:

#### • November 4, 2024 – November 23, 2024

VIVAFY e.U. Graz

Development of a vector-based custom font based on the company logo in collaboration with the company. Implementation of a JavaScript module to integrate the font into a website. Additional contribution to the conceptual planning of a company website, with a focus on design, structure, and technical feasibility.

#### • April 8, 2024 – May 3, 2024

BJB-media - Agentur für Digitale Medien, Graz

Research and analysis of modal window components as part of the conceptual internal system for managing employees and orders. Implementation of a PHP-based structure, where the project was built in React from scratch. Focus on comparing maintainability and modern frontend technologies.

#### • September 4, 2023 – September 29, 2023

AIT Forschungsges. mbH, Graz

Concept and design of a prototype for modernizing an existing website using Adobe XD. Implementation of the concept in WordPress using Elementor. Integration of JavaScript features such as dropdown menus outside the header area, with a strong focus on usability and modern web standards.
